Mehr Observatory- IRAN, ITAU

- ITAU is the first interdisciplinary teacher union of Iran those teachers from each three levels: Elementary, Secondary school and high school can be its member and work in astronomy and nature fields simultaneously.
- After many years of activities there are 20 active local groups of teachers and students in Bushehr and 9 more associations in other provinces of Iran .This association is busy with teaching the teachers and teacher-students especially in underprivileged. Till now more than 2000 teachers have gained education in this field from this union. Also, about 10000 students annually participate in different activities and workshops in motivating the teachers and forming local and international teacher groups are some of the aims different ways. Teaching astronomy and environmental to the teachers, of this union.

Beirami

- The result of proper training of teachers and their attention to environmental protection has led to the formation of the most important environmental defense movements in Bushehr province, in all of which it has been led and managed by teachers. For example, in 2016, prevented the establishment of a petrochemical plant in the middle of the abpaksh. also in 2018 because resistance of people operation of a stone mine that caused the destruction of the Biramy Mountain and the water springs of the region was stopped , the leaderships of that protest were teachers.

Beirami

- One of the other efforts of teachers to preserve environment is Resistance against the destruction of Avicenna forest and the rescue of Nayband National Park from a tourist town and hotel construction that is still underway. The result of six years of efforts by these groups.
- Preventing the establishment of a petrochemical plant in the grove ,Three large mines in environmentally sensitive areas And so on.

Arya sasol petrochemical company- Nayband

- ITAU tried to correct the views of society as much as possible. In the first step: training in teamwork and holding joint programs will create a close friendship between peoples. Training And preventing excessive consumption, especially of vital elements such as water, has an important role in preventing poverty and migration.

Teachers courses

- Accompanying the local community and protecting the environment and planting trees and protecting animals are a great help to the environment. Self-knowledge and better understanding of them self in the form of team projects will improve students' view of future business.

Thank you so much for your attention!!
